Thank you for considering Quinn Process Equipment Company as a supplier for your equipment needs.

Please, review the enclosed equipment brochures. If there are any questions, please, feel free to contact us.

Also, note that the majority of the equipment in these brochures is available in a variety of materials of construction to suit most abrasive and corrosive applications. We also have the capability to customize the equipment to suit the particular application.

The QPEC Solvent Extraction Mixer-Settlers are available in virtually any size required for flows from 100m³ per minute up to 7.5 cubic meters per minute. The table is simply for reference.

Feel free to contact us with any questions regarding the equipment in these brochures. We also do custom fabrication in a wide range of materials of construction, so, please, feel free to send us your specifications.
